Professional Summary

Engineering Manager with 5+ years of experience leading the development and scaling of mobile and web platforms. Successfully launched LAAM consumer mobile app, reaching ~1M downloads across Android and iOS while building backend systems handling 20K+ daily requests. Experienced in Flutter, React Native, Python, and GCP with cloud-native architectures. Committed to deliver reliable and scalable solutions.

Core Skills

- Engineering & Leadership:
- System & Mobile Architecture | Agile Development | Cross-functional Collaboration | Team Mentorship & Coaching
- Technologies & Tools:
- Flutter | React Native | Nuxt.js | Dart | Python (Flask, Django) | REST APIs | Google Cloud Platform | Cloud Run | Big Query | Docker | PostgreSQL | MySQL | MongoDB

Professional Experience

LAAM TECHNOLOGIES – LAHORE, PAKISTAN

Software Engineering Lead
March 2026 – Present

- Led development and scaling of the LAAM Consumer Mobile App, achieving ~1M downloads across iOS and Android within months of launch
- Mobile adoption drove most orders during major sales events including 11.11
- Launched LAAM Reels, Pakistan's first shoppable fashion reels experience, enabling content-driven product discovery and instant purchase
- Scaled a mobile platform supporting 10K+ reels, 1K+ brands, and thousands of creators
- Led a cross-functional mobile engineering team delivering high-performance React Native applications
- Focused on mobile architecture, scalability, performance optimization, and product reliability

Software Engineering Manager
Oct 2023 – Feb 2025

- Led engineering teams responsible for platform services, seller systems, and marketplace infrastructure.
- Managed cross-functional engineering teams delivering marketplace and backend services
- Architected scalable systems supporting seller operations and platform growth
- Worked across mobile platforms, backend APIs, and cloud infrastructure
- Partnered with product teams to align engineering initiatives with business goals

Software Engineer III
Apr 2023 – Sep 2023

- Built Transaction Service handling 20K+ daily requests, streamlining financial processes and ledger automation.
- Developed Customer Feedback Service processing 9K+ daily requests, enabling proactive issue resolution and partner NPS calculation.
- Implemented analytics pipelines using Google Big Query and GCP.

Software Engineer II
Oct 2021 – Mar 2023

- Transitioned Flutter mobile partner app to Flutter Web, increasing accessibility and user reach.
- Developed REST APIs supporting 3M+ orders and 500K+ shipments.
- Integrated logistics providers including DHL, FedEx, Insta-World.
- Optimized SQL queries for vendor dashboards, improving operational insights.

Software Engineer (LAAM)
Oct 2020 – Sep 2021

- Built internal Flutter web application for vendor and order management.
- Streamlined order processing, product management, and collection organization.

SOFTWARE DEVELOPER STRAIGHT UP TECHNOLOGIES - ISLAMABAD, PAKISTAN

Jul 2020 – Sep 2020

- Built Flutter mobile application (QOL Products) using Bloc state management.
- Replicated figma design components into user friendly interface.

Key Projects

- LAAM Consumer Mobile App: Led launch and scaling across Android and iOS (~1M downloads), integrating shoppable fashion reels and scalable backend services.
- LAAM Seller App: Developed mobile and backend platform for sellers, implementing REST APIs, logistics integration, and dashboard analytics.
- Scholarship SPY: Django recommendation system using NLP (LDA, Fast Text, Cosine Similarity).
- Doodle Mobile App: Freelance project for Doodel.se, implementing mobile features and seamless user experience.
- Zenvoice: Freelance mobile project for voice-driven features and user engagement.

Technologies And Tools

- Languages: Dart | Python | Go | SQL | GraphQL | Nuxt.js | Vue.js
- Frameworks: Flutter | Flask | Django | React Native
- Cloud & DevOps: Google Cloud Platform | Cloud Run | BigQuery | Docker
- Databases: PostgreSQL | MySQL | MongoDB
- Patterns: Bloc | Provider | Get-It | Get-X

Certifications

- Flutter Puzzle Hack — Flutter, 2022
- Flutter Development Bootcamp with Dart — The App Brewery, 2020

Achievements

- Level 2 Seller — Fiverr
- Rising Talent — Upwork

Education

BS - Computer Science FAST-NUCES (National University of Computer and Emerging Sciences), Faisalabad, Pakistan | 2016 – 2020
